Gold	AR70/M OR 530 Eur incl. VAT

## Installation Guide for Cielo Flush Plate

### Preparing the Wall

- Ensure the wall surface is tiled and levelled.
- The cut-out for the fixture in wall panels should be made according to Geberit's instructions. Tile as close to the box as possible

### Installing the Mounting Frame

- Attach the mounting bar to the fixture as shown in the image (red)
- Mount the plate and align the flush rods to the flush buttons.
- Secure the plate using the provided screws by aligning them with the designated holes.
- Ensure the plate is level and firmly attached.

### Cleaning

Wipe the surface with a soft cloth and lukewarm water and possibly with soap solution. Avoid alkaline, acid-liming or abrasive cleaners. Brass is a material that over time gets a beautiful patina but can be polished with brass polish. Aged and Burnished Brass also gets patina but should not be polished. The galvanized surfaces retain their lustre.
