Article

Polished Brass	SETERBARE2CI ON 1.495 Eur incl. VAT
Polished Chrome	SETERBARE2CI CR 1.695 Eur incl. VAT
Aged Brass	SETERBARE2CI AB 1.895 Eur incl. VAT
Burnished Brass	SETERBARE2CI BB 1.895 Eur incl. VAT
Satin Nickel	SETERBARE2CI NS 2.095 Eur incl. VAT
Black Nickel	SETERBARE2CI NNO 2.095 Eur incl. VAT
Gold	SETERBARE2CI OR 2.495 Eur incl. VAT

Cleaning

Wipe the surface with a soft cloth and lukewarm water and possibly with soap solution. Avoid alkaline, acid-liming or abrasive cleaners. Brass is a material that over time gets a beautiful patina but can be polished with brass polish. Aged and Burnished Brass also gets patina but should not be polished. The galvanized surfaces retain their lustre.

Installation Guide

Before You Begin

- Installation must be carried out by a qualified electrician in accordance with local electrical regulations.
- Always isolate the power supply before starting any work.
- The heater is electric only. It is not connected to the plumbing system.
- Each bar has a power output of 60 W.
- The unit is supplied without thermostat. Control is either via a built-in on/off button (if specified) or via an external wall switch.
- Fixing screws and wall plugs are not supplied and must be selected by the installer according to wall type.

1. Electrical preparation

Prepare the concealed electrical wall box (included) at the connection point, indicated in red. Ensure the supply voltage and electrical protection comply with local standards for bathroom installations.

2. Mounting the structure

Fix the mounting structure or individual bars to the wall using suitable screws. Do not fully tighten until final alignment is checked. Carefully follow the indicated **minimum and maximum tolerance against the finalized wall**.

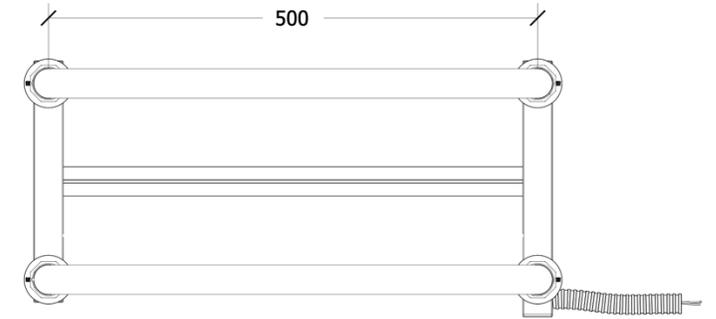

3. Electrical connection and assembly

Position the escutcheon covers on each bar, ensure the o-ring is correctly seated inside each cover. Feed the heating cable through the bar, use the prepared guide strings if needed. Slide the bars into place and fasten the securing screw. Slide the escutcheon covers flush to the wall.

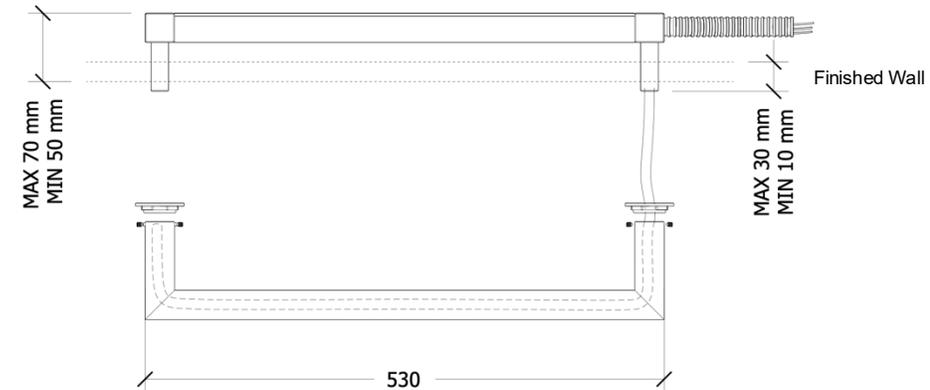

1. Power-on and functional test

Restore power at the main supply. Switch the unit on using the button (optional) or wall switch. Allow the towel rail to heat up and confirm uniform warmth across all bars. Verify correct operation.

Care and Maintenance

Clean only with a soft cloth and lukewarm water, optionally with mild soap.

Do not use abrasive, acidic or alkaline cleaners.

Polished brass can be lightly polished if desired.

Aged and burnished brass should not be polished, as natural patina is part of the finish.
